

Mums for 1957

WAYNE FLORAL CO.

White Springs Road

Geneva, N. Y.

Instructions for Ordering

TERMS OF SALE

PRICE

\$45.00 per 1000 in multiples of 50 of a variety, total order at least 1000 cuttings. The price is the same for all varieties listed in our catalogue.

\$5.00 per 100 in multiples of 50, for orders totalling between 300 and 900 cuttings.

\$6.00 per 100 in multiples of 50, for orders totalling between 100 and 250 cuttings.

We also fill orders calling for 25 of a variety, due to the extra labor this involves we charge 1c more per cutting for all varieties ordered in multiples of 25, thus bringing the price to 5c, 6c and 7c per cutting, depending on the total amount of the order.

Minimum order 25 of one variety.

SUBSTITUTIONS

We will substitute varieties as good or better for any items not listed in this catalogue.

To speed up delivery we will also substitute, to the best of our ability, if on the shipping date certain varieties happen not to be available. No substitutions will be made if this is specifically mentioned when ordering.

SHIPPING INFORMATION

Special shipping instructions and address if different from your regular mail address should be shown on your order. All cuttings are shipped Railway Express, Air Freight or Air Express Collect and are in perfect condition before being accepted by the Express Company. Therefore, if there is any damage enroute from being broken, heated, frozen or too long in transit, call your express agent to inspect the same, make out bad order report and file claim because our responsibility ceases after the Express Company has accepted our shipments.

We, Wayne Floral Company, give no warranty, express or implied, as to the productiveness of any cuttings or plants we send out and we will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the cuttings or plants.

CHANGES OR CANCELLATIONS

Changes or cancellations on your order must be received at least 30 days before shipping time. We cannot accept changes or cancellations on Mum cutting orders later than 30 days before specified shipping date.

Causes of Premature Budding of Chrysanthemum Cuttings During the Spring. How to Prevent it.

During the Spring, until May 1st, budding can occur, depending upon the variety and a temperature of 60 degrees or above.

To prevent setting of buds additional light can be given during the early Spring months. Use 60 watt bulbs, spaced four feet apart and about 30 inches above the plants. Use lights two hours each night until May 1.

LARGE FLOWERING VARIETIES

H—indicates hardy varieties.

P—indicates varieties suitable for pot plants.

Price: \$45.00 per 1000 for orders totalling 1000 cuttings and up, in multiples of 50 each. Please notice we offer all varieties, including the more recent introductions, at the same price. For orders totalling less than 1000 cuttings or calling for less than 50 of a variety we charge slightly higher prices, see quotation on page 2.

YEAR AROUND POTTED MUM PRODUCTION

Year around pot Mums are becoming rapidly much more popular with the average grower than year around cut mums. No wonder, a beautiful 6 inch Chrysanthemum pot is produced in three months or even in less time, depending on temperature and variety. Compare this with the time necessary for finishing a Cyclamen, Azalea or Hydrangea and you will understand why pot Mums are now grown in ever increasing quantities.

The one pinch method produces excellent plants. Some growers pinch twice, this delays flowering and is thus a less common practice. Plants of fair quality can be grown by potting and pinching the same day. However, a more perfect plant is produced by pinching a week or two weeks after planting. This means a lighting period of two weeks or less from September 1st till March 15th. For lighting use 60 watt bulbs, spaced 4 feet apart, 30 inches above the plants, three hours each night. Apply lights between 8 P.M. and 5 A.M., so that there is never a continuous darkness of more than 8½ hours.

Maintain at least a 60 degree night temperature, some experts advise 65 degrees but most growers seem to obtain satisfactory results with 60 degrees. After color shows, drop temperature to 55 degrees or less.

Pot Mums can be grown in any good soil and peat mixture. Use five cuttings for a so-called 6 inch $\frac{3}{4}$ Azalea pan, this is the most popular size.

If you prefer low pots, but use tall growing varieties, as the Lace varieties and Indianapolis varieties, you have to apply the delay pinching method, this means pinch about 10 days to two weeks after short day treatment has begun.

Black cloth for bud and flower formation should be used from March 15th till August 30th, no black cloth is necessary during the rest of the year. Neither is artificial light needed between March 15 and September 1st.

Try a moderate amount of potted Mums for whenever you think you can make good use of them, as for Easter flowering, for September flowering or for every month in the year, as already practiced by many growers. Growing of potted Mums is both simple and profitable.

Please feel free to write for additional information.
